Mr. Smith gave his wife ten pounds for her birthday. Mrs. Smith went shopping. She waited for the bus, and when it came, she got on and sat down next to an old lady. She was sure that the lady sitting next to her had stolen them. She decided to take back the money from the old lady's handbag.

Then she carefully took the notes and put them in her bag. When she went back home that evening, she showed her husband the beautiful dress she had bought. "How much did you pay for it?" he asked. A zoo is a place where we can see wild animals. There is usually one zoo in each country. In England there are five zoos. The biggest is in London. Some people don't like the zoo because they think that it is wrong to keep wild animals in cages. Other people agree, but they think that if the cage is large, the animals will feel happy. The animals have good food everyday and if they are ill, they are given the suitable medicine. People don't have to worry about animals.

In the forest, small animals don't live long because they are killed by larger animals. In a zoo these animals are safe. The very *large* animals like elephants and giraffes are unhappy because they miss the wide, open places where they used to live. Most people enjoy visiting the zoo. **They** usually prefer to look at the large animals although they are not always the most interesting. Sometimes visitors to the zoo are very unkind to animals.
