VI. Reading Comprehension (20 Marks)

20

Read the following passage, then answer the questions below:

Mexico City is one of the most polluted cities in the world. It has been said that Mexico City's air has gone from being one of the world's cleanest to one of the world's most polluted. Unfortunately, the worst problem gripping the city is the **massive** cloud of smog that hangs over it almost every day. Mexico City has the highest level of ground level ozone in the world, according to the World health Organization.

There are mountains all around the city and there is not much wind, so the pollution is not blown away. The people of Mexico City have tried to cut the pollution out. They have moved the factories outside the city. They have planted more trees to produce oxygen and keep the air clean. There are new traffic rules so that there are fewer cars on the city roads. They put signs of **different** colours on all the cars. So there are some colours of cars for every day.

London also used to have the same problem like Mexico. Now drivers have to pay money to drive into the centre of London during working hours. This has succeeded in reducing the number of drivers who come into London every day. Many people now use buses and trains instead of **their** own cars.

A. From a, b, c and d choose the correct answer: (4 X 2½ = 10 M)

23. The best title for this passage is.....

- | | |
|-------------------------|-----------------------------------|
| a. Working Hours | b. Coloured Signs |
| c. Mountains and Cities | d. Pollution in Big Cities |

24. The underlined word "**massive**" in paragraph (1) means

- | | | | |
|-----------|----------------------|---------------|---------|
| a. little | b. very large | c. very small | d. tiny |
|-----------|----------------------|---------------|---------|

25. The *opposite* of the underlined word **different** in paragraph (2) is.....

- a. fewer
- b. same
- c. clean
- d. polluted

26. The underlined word "**their**" in paragraph (3) refers to

- a. people in London
- b. people in Mexico City
- c. working hours
- d. buses and trains

B. Answer the following questions: (4 X 2½ = 10 M)

27. What is the worst problem facing Mexico City?

The massive cloud of smog that hangs over it almost every day.

28. How did the people of Mexico City cut the pollution out?

They have moved factories outside the city. They have planted more trees to produce oxygen and keep the air clean. There made new traffic rules to reduce the number of cars on the city roads.

29. What should drivers do to drive into the centre of London during working hours?

Now drivers have to pay money to drive into the center of London during working hours.

30. Why isn't the pollution over Mexico City blown away?

Because there are mountains all around the city and there is not much wind.

Any reasonable answer related to the text is accepted.
