Suddenly the doorbell rang. It was his cousin, Max, “Hiii!, I have come to stay here for the holiday.” Kevin never expected his mother’s surprise to be this bad. Things were not good. After breakfast Kevin decided to do some paintings. Luckily **Max was not around**. Suddenly Max arrived with a bottle of water that he dropped on the painting. He stopped painting because water covered the paper.

The next day was also bad. Everything was good till the evening. It all started when Max put his dirty clothes in the washing machine. The machine stopped working because Max put his old shoes with the clothes.

-Read the following passage then answer the questions below :

The Moon goes around the Earth. This is called an "orbit". The same side of the Moon always faces the Earth. It takes one month for the Moon to go around the Earth.. It is about $\frac{1}{4}$ the size of the Earth. That means the Earth is four times larger than the Moon. The Moon is a dry land that has millions of rocks and dust. The surface of the Moon is covered with about two inches of dust. The Moon has no air or atmosphere around it, so it does not stay as comfortable and warm like the Earth. The temperature on the Moon is -170o F at night which is very cold, but it* is 265o F during the day which is very hot. The hottest temperature on Earth is about 130o F, so the Moon can get over twice as hot! even in the daytime! That is because there is no air or atmosphere.

There is also no sound because sound waves go through the air. The Moon is silent. There is no wind, rain or any other type of weather on the Moon. The two astronauts Neil Armstrong and Buzz Aldrin were the first people to walk on the Moon on July 20, 1969. Scientists found that the Moon rocks are similar* to the rocks on Earth. The Mona Lisa is without a doubt the most famous painting in the world. It was created by Leonardo da Vinci in the years 1503- 1506 using oil paints on wood. Leonardo da Vinci was an Italian painter and a scientist who was a real genius. His notebooks, where he recorded his ideas, show to us a scientific creative genius who was centuries ahead of his time.

The Mona Lisa is thought to have been the painting of La Gioconda, a young woman who was 24 years old at that time. Leonardo da Vinci loved the portrait so much that he never gave it to the person for whom he painted it. In fact, he carried it with him for years after it was completed. Also, some parts of the , painting have been damaged and painted over. The painting was stolen in 1911 and wasn't recovered for two years Today, however, the painting is behind bullet-proof glass in Paris in the Louvre, and international agreements prohibit its display elsewhere.

Many years ago, fishermen in Japan used birds to catch fish. This art of this kind of fishing is said to be at least a thousand years old. Today, however, fishing in this way has simply become a sport.

On summer nights, the fishing boats set out on rivers in different parts of the country. At the front of each boat, there is an iron basket in which a wood fire is kept burning. As the boats float, these fires make bright **patterns** on the water. The fishermen beat the sides of the boat to encourage the birds. A long piece of string is tied round the neck of each bird. Then the birds are set free and they fly close to the water in search of fish. The moment a bird catches a fish, **it** is pulled back on the boat.
