

Grade 12 Set Book Questions

Unit 1

1-“A society without laws cannot survive.” To what extent do you agree to this statement? Give reasons.

Laws are so important to keep everyone safe and equal in rights and duties .without laws; life would be chaos and violent.

2- How can we teach children to respect the law?

Parents should set examples to their children by following even the simplest details. Parents should always guide their children to follow the school rules.

3- In your opinion, how best can we stop motorists from breaking speed limits in residential areas?

They should be banned from driving. They may be fined or even sent to prisons.

4-In your view, why is computer crime on the increase?

People are depending on computers for everything in life increasingly. People tend to use online banking and air booking.

5-What is the main purpose of sending people to prison: to punish them, or to protect society? Give reasons.

I think both of them .They will be punished for doing something wrong, and that will set example for other which will protect the society.

6- How do Islamic values influence the system of laws in Kuwait?

Laws are taken from the teachings of Islam; the Holly Qur'an and Hadith. Our Islamic values shape the customs and traditions, which affect the laws. They control everyone in the society and tend to keep everyone safe and equal.

7- What makes computer crime more difficult to solve than traditional crime?

Criminals are invisible and crimes can't be proved. Crimes are easy to be planned and committed.

8- In your opinion, what laws need to be enforced to prevent computer crimes?

Such laws are important to stop crimes and keep us safe. Criminals must be punished to set example for others.

9- Do you think people should solve minor issues in court? Why or why not?

I'm against more court cases as we should be tolerant and forgive each other. Also, these petty problems prevent the court from punishing the real criminals.

10- How else could people solve minor disagreements?

They could try to solve it cordially by the elderly according to the spreading traditions and customs.

11-Why do you think many people are for litigation?

They want to ensure that everyone are equal in duties and rights. They think that it is the duty of the governments to serve , protect and respect everyone .

Unit 2

1-“People migrate for different reasons. Explain. (Why do people leave their home countries?)

Some people escape from the natural disasters, wars, famines or poverty. Some others seek a better life, education or services.

2- How has Kuwait provided a good home for skilled workers?

People came to work in high-tech jobs and cities. Workers have good salaries and high standards of living.

3-Why do animals and birds migrate?

Animals migrate to survive and raise babies. They seek warm weather and food.

4-Do animals and people migrate for the same reasons? Justify your answer.

Animals migrate to survive and raise babies. Humans migrate sometimes to survive and sometimes to seek a better life.

5-What do you think can be done to persuade the brilliant minds not to leave their home countries?

Government should nurture them by providing them with scholarships, money and special centers. They should be provided by good positions with good salaries and high standard of living.

6-What do you think are the advantages and disadvantages of migration?

It can give the chance to learn new languages, cultures and find better life, jobs and education. Still, it can change some people's costumes, cultures and way of life.

Unit 3

1-People throughout the world share various human values. Why do you think they are important?

They help people solve common human problems. They help understand people of different cultures.

2-Why do you think charity organizations are usually established?

They want to look after the sick. They want to donate money for those people in need. They want to protect and help people in hardship. They want to provide people's basic human needs.

3- Would you want to volunteer for a charity? Why or why not?

Yes, to distribute food to needy people. To take part in awareness in school and universities.

4-Why do you think charitable work is done by an NGO, rather than the government?

They can work freely all over the world with their volunteers and thereby reach anyone in need anywhere.

5- What benefits do volunteers usually gain from helping the needy?

Their real reward is to change the life of the poor for the better

6- Many people don't seem to have grasped the true meaning of freedom. Discuss.

It doesn't mean acting as one wishes. It means the balance between one's freedom and the needs of the society.

7- “By compassion we make others’ misery our own, and so, by relieving them, we relieve ourselves also.” Explain this quote.

Compassion drives us to donate to defend bodies against illness and put smiles on children’s faces.

8- What do you think can be done to encourage people to donate to a charity?

We can make advertisements. We can run campaigns.

9- What do you think are the qualities of a successful diplomat?

A diplomat should have confidence, friendliness and willingness to work very hard.

10- Being a diplomat, how best would you serve your country?

I can work hard to make researches that benefit our relations with the other countries.

Set Book Questions for Units Four, Five, and Six

1. Kuwait is a clear example of desert climate. Explain.

Kuwait is mostly a desert land. The climate is hot and dry. It is almost an arid land, with little rain.

2. What are the causes of desertification?

There are many causes of desertification. There are natural causes like the change in climate and lack of rain. There are man-made causes such as farmers over cultivating the land, with the result that the soil becomes poor and unproductive. Other farmers overgraze their lands, which kills grass and other plants. Also by loggers who cut down trees, which erodes the soil.

3. Why is desertification a serious problem?

What are the dangers/side effects of desertification?

The soil becomes poor and unproductive, and people may die because of the shortage of food and water. Desertification can also create conditions that produce strong winds and treacherous wildfires.

4. How can we solve the problem of desertification?

We can solve this problem by planting trees, and stopping over cultivation and overgrazing.

5. What are the most precious resources in Kuwait?

Kuwait has some very important natural resources. It is mainly rich in oil. It also has a natural harbour, fisheries, and water supplies.

6. What can the government, or the Public Authority of Agriculture and Fisheries, do to encourage planting in Kuwait?

It can give free lands to the citizens to cultivate them, and provide farmers with seeds, tools, and fertilizers. In addition, it can supply farms with modern irrigation systems.

7. What is the importance of rainforests?

The rainforests are home to many different animals and plants. It is important for the climate because it absorbs carbon dioxide, and gives us fresh air.

8. Why are the rainforests being destroyed?

There are many reasons why the rainforests are being destroyed. Firstly, ranchers use the land for their cattle. Secondly, loggers sell the wood from the trees which they cut down. Thirdly, oil companies try to find more oil. Finally, farmers try to make more land to grow food.

9. What are the effects of destroying rainforests?

What are the results of deforestation?

Deforestation, which is cutting down forest trees, makes the land unproductive. It causes change in the climate like droughts and dust storms. It destroys the natural habitat of the forest animals.

10. What is the importance of water?

Water is important for every life source. Humans, animals, and plants must have water to survive. It keeps us healthy and flushes out the toxins from our bodies. It's used for drinking, cooking, cleaning, and it's a habitat for marine life.

11. What are the reasons for the scarcity of water around the world?

The great development in human activities, and the increasing population has led to the scarcity of water around the world. Also, the unwarranted consumption of water, which causes water shortage.

12. What are the different ways to conserve water?

We should never leave the water running, and check the faucets and pipes for leaks. We could use water-saving devices. We must never over use water in car washing, house cleaning, or plant watering.

13.What are the procedures taken by the Kuwaiti government to preserve water?

Kuwait is the first country in the Middle East to develop desalination plants. The Kuwait Institute for Scientific Research has implemented several studies into improving the use of water for agriculture.

14.Recycling is important. How can it be useful to the environment?

Recycling helps the environment because it saves natural resources. It can save energy. It also reduces the waste in landfills, which reduces pollution.

15.Why is it necessary to recycling our waste?

Because the earth is running out of resources. We are running out places to bury our waste, and burning the waste pollutes the atmosphere.

16.What are the major environmental issues that concern people?

There are many environmental issues that concern people, such as caring for the environment, and using the world's resources in moderation. Also, protecting endangered species.

17.Mention some solutions to save the lives of endangered animals?

How can we protect endangered animals?

We should stop hunting the animals. The government should have laws to punish hunters. We can set special expansive reservations to protect endangered animals.

18.What are the different ways plants use to protect themselves from animal attacks?

There are different ways in which plants protect themselves. Some have large thorns like cactus. Some protect themselves by poisoning their enemies. Some protect themselves by ants which live on their branches. Some catch and consume insects which land on them.

19.What is the importance of plants?

Plants provide nourishment for people and animals. Plants enrich the soil and protect it from erosion. They produce oxygen, which we need to breathe. They provide us with medicine, oil, perfumes, waxes, fibers, and fuel.

20.How does Islam encourage people to plant and cultivate vegetation?

The Prophet Mohammad, peace be upon him, said that any Muslim who plants vegetation to be eaten from by man or animal will receive recompense from Allah. The Prophet, peace be upon him, has also said that anyone who

plants a tree under which people can seek shade or shelter from the sun will have his reward from Allah.

21. Our religion Islam is against cutting down trees. Why?

Because it encroaches on the bounty of everyone. It also disturbs the beauty of the environment which Allah has created.

22. What do you know about the Arfaj plant?

It is considered Kuwait's national flower. It was used as a natural medicine. It is a source of bedding and firewood. It is a food source for sheep.

23. By protecting plants, we are protecting a part of Kuwait itself. Explain.

Plants are an important part of nature. Rare plants, like Arfaj, is considered the national flower of Kuwait, so we are protecting our heritage.
