VI. Reading Comprehension & Summary Making

Read the following passage, then answer the questions below:

It is 9 o'clock on Wednesday evening. All is suspiciously quiet in my 15-year-old daughter Laurie's normally noisy room. My youngest daughter, aged 11, comes downstairs and says her sister is on Face book.

With her final exams now just weeks away, I am getting desperate. I call Laurie and beg her to **disable** her Face book account. "Dad, I can't do it," she says. Of course, I could take matters into my own hands, take away her laptop and shut down our wireless connection at night, but I have strived to trust my children. What really concerns me isn't the stuff she is posting on her page, it's the worrying amount of time she spends logged on Face book.

I am convinced that my daughter's techno-habit has turned her from a bright, well-read student to someone who stays up late, can't concentrate and will probably fail her exams. But this was partly our fault. We gave her a laptop and an unlimited access to the Internet, stupidly thinking that this would help her with her studies.

Discovering Laurie's habit was very disappointing and saddening because I had always presumed that Face book was for the sad and the lonely- not for someone gifted with fully-formed social skills. Where she sees a useful communication tool, I see a mind-numbing, childish way of passing precious time. It requires constant commitment and gets you into trouble, too. As for her school work! Her grades have slipped dramatically and her teachers complain about her lack of application and concentration. If I confront her, she flatly refuses to blame the Internet. However, I am doing my best to wean Laurie off Face book because it has adversely affected her life and school performance.

A) From a, b, c, and d choose the right answer:**1- Circle the most appropriate title**

- a- Facebook is very useful for my daughter's study
- b- Facebook is ruining my daughter's future
- c- Facebook is giving my daughter fantastic opportunities
- d- Facebook is the best communication tool

2- “to wean Laurie off Facebook” (paragraph 5) means.....

- a- to encourage Laurie to use Facebook
- b- to make Laurie stop using Facebook
- c- to oblige Laurie to use Facebook
- d- to ask Laurie to control her Facebook logging time.

3- All of the sentences below are FALSE except.....

- a- Simon and his daughter share the same opinion about Facebook.
- b- Teachers don't care about Laurie's results.
- c- Laurie refuses to blame the Internet.
- d- The parents share no responsibility for Laurie's Facebook addiction.

4- The word “disable” in (paragraph 2) means.....

- a- deactivate
- b- activate
- c- share
- d- fail

B) Answer the following questions:**5- Pick out 3 consequences of Laurie's Facebook addiction.**

.....

6- What really concerns Laurie's father?

.....

7- Why did the parents provide a laptop and an internet access to Laurie?

VI. Reading Comprehension & Summary Making

Read the following passage, then answer the questions below:

Television is an important part of modern life. We can hardly imagine living without **it**. If I were forced to live without television, however, I would pursue other interests, socialize with friends and family, and exercise more often.

Without TV in my home, I would have time to pursue other interests. For example, I love to play the piano and without the distraction of TV, I would have more time to practice. At other times, I could paint portraits of my family and friends. Painting takes a lot of time and if I had no television, I would surely have enough to complete my work. Time to follow my interests would be much easier to find if someone came and took away my TV.

Not only that, but I could find much more time to socialize with my friends and family if my TV disappeared. At my house, the TV is always on during dinner. As a result, we rarely have conversation with one another. Without the TV to interfere with us, we might have time to tell each other about what happened to us that day. In addition, we could more easily find more time to talk with old friends on the telephone. Thus, social time would increase with no TV.

Most importantly, lacking a TV would give me a big increase in the available time for exercise in my life. With extra time, I could make the long journey to Bowen Island and go on an enjoyable hike in the mountains. Another exercise I could do more often would be to go swimming or to an aerobics class at Platinum Community Centre near my home. Having more exercise would provide big health benefits to me; watching more TV will only develop my bottom muscle.

Exercising frequently, **socializing** with friends and family, and pursuing other interests would be the benefits of having no TV at my home. Just think how much more time I would have if I got rid of my computer, too!

A) From a, b, c, and d choose the right answer:

1. The best title to the above passage is:

- | | |
|-------------------------|---------------------------|
| a. The importance of TV | b. Say NO to TV |
| c. The advantages of TV | d. Life is easier with TV |

2- The word "**it**" in line 1 refers back to:

- | | |
|---------------|----------------|

| c. life | d. exercise |

3- The best meaning of the word "**socializing**" is:

- a. visiting friends
- c. making friends

- b. leaving friends
- d. communicating with friends

4- The main idea of paragraph 2 is:

- a. TV may affect our life negatively.
- c. What I can do without TV.

- b. Exercising is very important.
- d. Watching TV can benefit us.

B) Answer the following questions:

5- What are the bad effects of TV on the family relationships?

.....

6- What kinds of exercises would the writer do without TV?

.....

7- According to the passage, do you think that the writer for or against TV at home? Why?

VI. Reading Comprehension & Summary Making

Read the following passage, then answer the questions below:

The Great White Shark is the largest predatory shark, and is probably the most well-known and feared shark. The Great White Shark is gray or bluish above and white below. The largest Great Whites can reach lengths of 22 feet and weigh up to 5,000 pounds. Most are between 13 and 16 feet and weigh 1,500-2,400 pounds.

The Great White has massive teeth, which are positioned in rows and serrated. When the Great White attacks, it bites its prey and shakes its head back and forth. The serrated teeth act as a saw and literally tear the victim apart. The Great White Shark often swallows many of its own teeth in an attack. The Great White Shark normally feeds on fish, dolphins, and turtles. It is thought to locate its prey by electro sense and by smell. Like all sharks, Great Whites have special pores called Ampullae of Lorenzini, **which** enable them to detect the electromagnetic fields radiated by moving organisms. Great Whites can detect voltage as small as one half billionth of a volt.

Great Whites employ several hunting techniques depending on the prey. Most of the time, the shark will remain still underwater before ambushing its prey from underneath. In the case of hunting some kinds of seals, the impact of the shark is so powerful that it knocks both the shark and the seal clear out of the water. With larger prey such as elephant seals, the shark will simply take a huge bite out of it and wait for it to bleed to death. When hunting dolphins, the shark will attack from above, presumably to avoid detection from the dolphin's echolocation.

Great White Sharks are most commonly observed throughout the world's sub-arctic coastal waters, though they likely spend most of their time in the open ocean. Highest concentrations are found in the waters off the coast of South Africa, Australia, California, and Mexico. The Great White Shark is also found in the Adriatic and Mediterranean Seas. Great White Sharks do not target humans as prey.

A) From a, b, c, and d choose the right answer:

VI. Reading Comprehension & Summary Making

Read the following passage, then answer the questions below:

For many people who live in cities, parks are an important part of the landscape. They provide a place for people to relax and play sports, as well as a refuge from the often harsh environment of a city. What people often overlook is that parks also provide considerable environmental benefits.

One benefit of parks is that plants absorb carbon dioxide—a key pollutant—and emit oxygen, which humans need to breathe. According to one study, an acre of trees can absorb the same amount of carbon dioxide that a typical car emits in 11,000 miles of driving. Parks also make cities cooler. Scientists have long noted what is called the Urban Heat Island Effect: building materials such as metal, concrete, and asphalt absorb much more of the sun's heat and release it much more quickly than organic surfaces like trees and grass. Because city landscapes contain so much of these building materials, cities are usually warmer than surrounding rural areas. Parks and other green spaces help to **mitigate** the Urban Heat Island Effect.

Unfortunately, many cities cannot easily create more parks because most land is already being used for buildings, roads, parking lots, and other essential parts of the urban environment. However, cities could benefit from many of the positive effects of parks by encouraging citizens to create another type of green space: rooftop gardens. While most people would not think of starting a garden on their roof, human beings have been planting gardens on rooftops for thousands of years. Some rooftop gardens are very complex and require complicated engineering, but **others** are simple container gardens that anyone can create with the investment of a few hundred dollars and a few hours of work.

Rooftop gardens provide many of the same benefits as other urban park and garden spaces, but without taking up the much-needed land. Like parks, rooftop gardens help to replace carbon dioxide in the air with nourishing oxygen. They also help to lessen the Urban Heat Island Effect, which can save people money. In the summer, rooftop gardens prevent buildings from absorbing heat from the sun, which can significantly reduce cooling bills. In the winter, gardens help hold in the heat that materials like brick and concrete radiate so quickly, leading to savings on heating bills. Rooftop vegetable and herb gardens can also provide fresh food for city dwellers, saving them money and making their diets healthier. Rooftop gardens are not only something everyone can enjoy, they are also a smart environmental investment.

VI. Reading Comprehension & Summary Making

Read the following passage, then answer the questions below:

Have you ever wondered what keeps a hot air balloon flying? The same principle that keeps food frozen in the open chest freezers at the grocery store allows hot air balloons to fly. It's a very basic principle: Hot air rises and cold air falls. So while the super-cooled air in the grocery store freezer settles down around the food, the hot air in a hot air balloon pushes up, keeping the balloon floating above the ground. In order to understand more about how this principle works in hot air balloons, it helps to know more about hot air balloons themselves.

A hot air balloon has three major parts: the basket, the burner, and the envelope. The basket is where passengers ride. The basket is usually made of wicker. This ensures that **it** will be comfortable and add little extra weight. The burner is positioned above the passenger's heads and produces a huge flame to heat the air inside the envelope. The envelope is the colorful fabric balloon that holds the hot air. When the air inside the envelope is heated, the balloon rises.

The pilot can control the up-and-down movements of the hot air balloon by regulating the heat in the envelope. To **ascend**, the pilot heats the air in the envelope. When the pilot is ready to land, the air in the balloon is allowed to cool and the balloon becomes heavier than air. This makes the balloon descend. To lift the balloon, the pilot moves a control that opens up the propane valve. This lever works just like the knobs on a gas grill or stove: As you turn it, the flow of gas increases, so the flame grows in size. The pilot can increase the vertical speed by blasting a larger flame to heat the air more rapidly. To move in a particular direction, a pilot ascends and descends to the appropriate level, and rides with the wind.

A flight in a hot air balloon is so unlike anything else you will experience in life today. Adventure Balloons provide the opportunity for your first flight by hot air balloon. Over 200 years old, this was how men first took to the skies - hot air ballooning just has to be one of the most fantastic ways to fly.

A. From a,b,c and d choose the correct answer

VI. Reading Comprehension & Summary Making

Read the following passage, then answer the questions below:

There is a famous expression in English: "Stop the world, I want to get off". This expression refers to a feeling of panic, or stress, that makes a person want to stop whatever they are doing, try to relax, and become calm again. "Stress" means pressure or tension. **It** is one of the most common causes of health problems in modern life. Too much stress results in physical and mental health problems.

There are numerous physical effects of stress. Stress can affect the heart. It can increase the pulse rate, make the heart miss beats, and cause high blood pressure. Stress can affect the respiratory system. It can lead to asthma. It can cause a person to breathe too fast, resulting in a loss of important carbon dioxide. Stress can affect the stomach it can cause stomach aches and problems digesting food. These are only a few examples of the wide range of illness and symptoms resulting from stress.

Emotions are also easily affected by stress. People suffering from stress often feel anxious. They may have panic attacks. They feel tired all the time, when people are under stress, they often overreact to little problems. For example, a normally gentle parent under a lot of stress at work may shout at a child for dropping a glass of juice, stress can make people angry, moody, or nervous.

Long-term stress can lead to a variety of serious mental illness. Depression, an extreme feeling of sadness and hopelessness, can be the result of continued and increasing stress. Drug addiction often develops as a result of overuse of drugs to try **relieve** stress. Eating disorders, such as anorexia, are sometimes caused by stress and are often made worse by stress. If stress is allowed to continue, then one's mental health is put to risk.

It is obvious that stress is a serious problem. It attacks the body .it affects the emotion. Untreated, it may eventually result in mental illness. Stress has great influence on health and well-being of our bodies, our feelings, and our minds, so, reduce stress: stop the world and rest for a while.
